

Step 1: Find the right
milk

The best milk is raw
milk from this animal

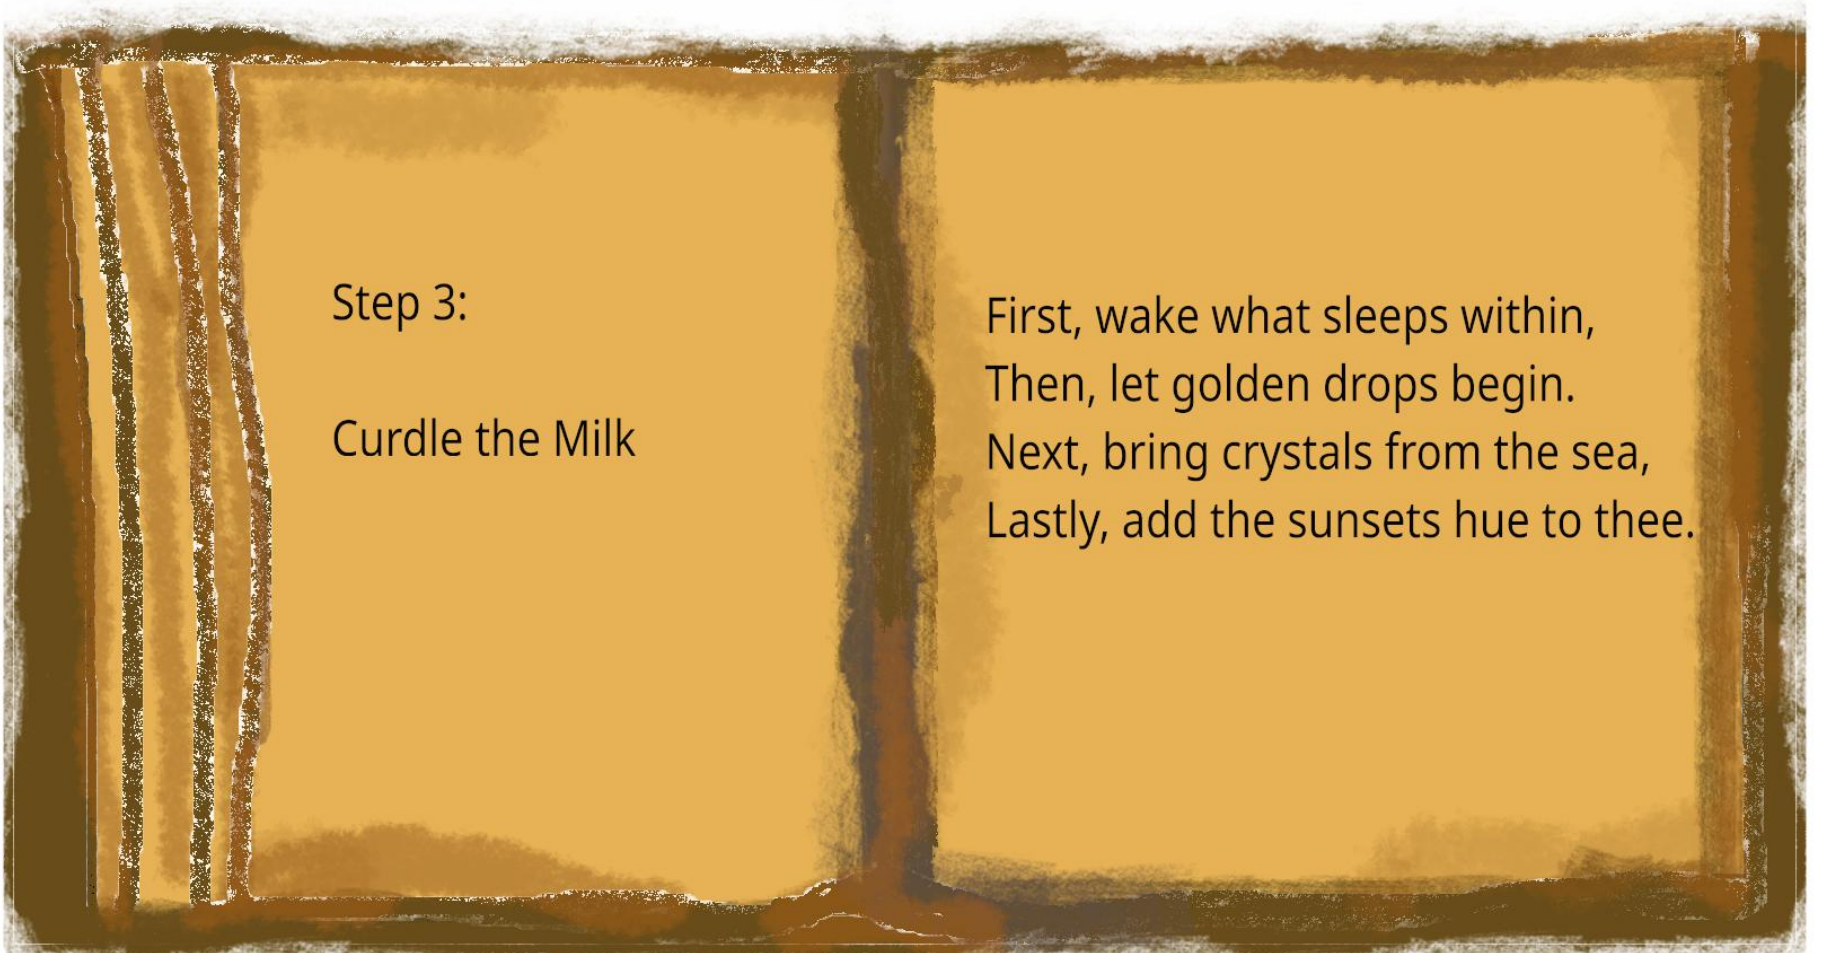

Step 2: Heat the Milk

Too cold and the culture sleeps. Too hot and you'll kill it. Watch the pot and follow the temperature marked by the mice.

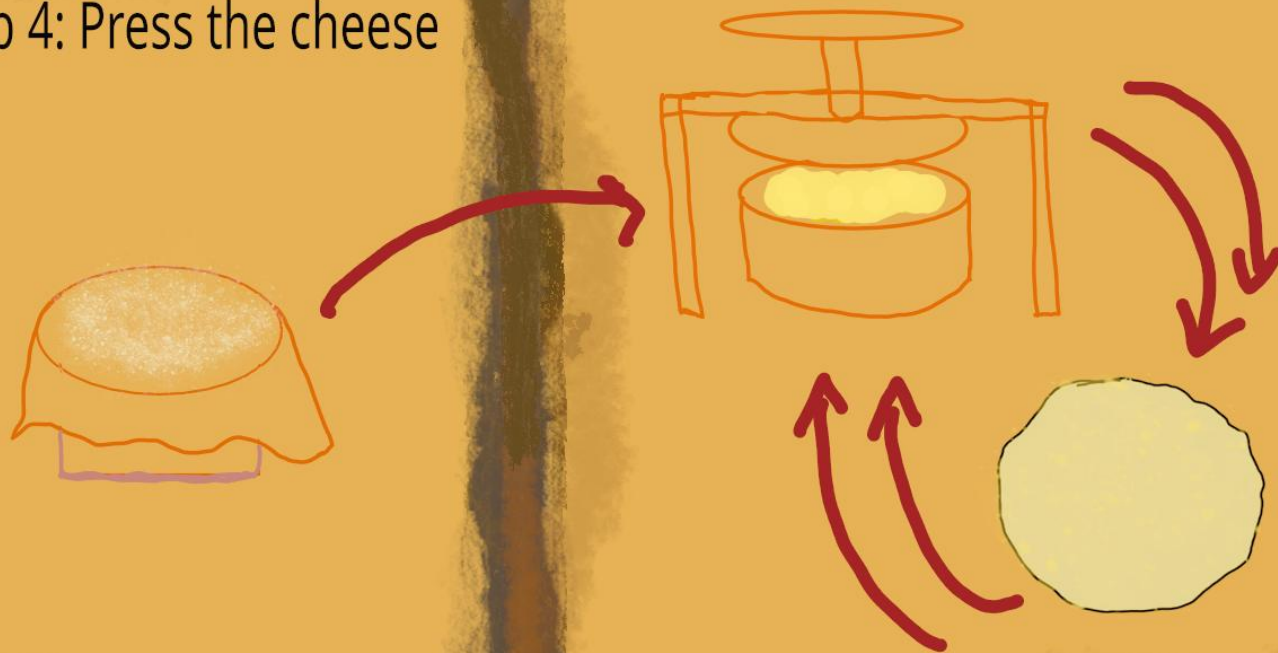

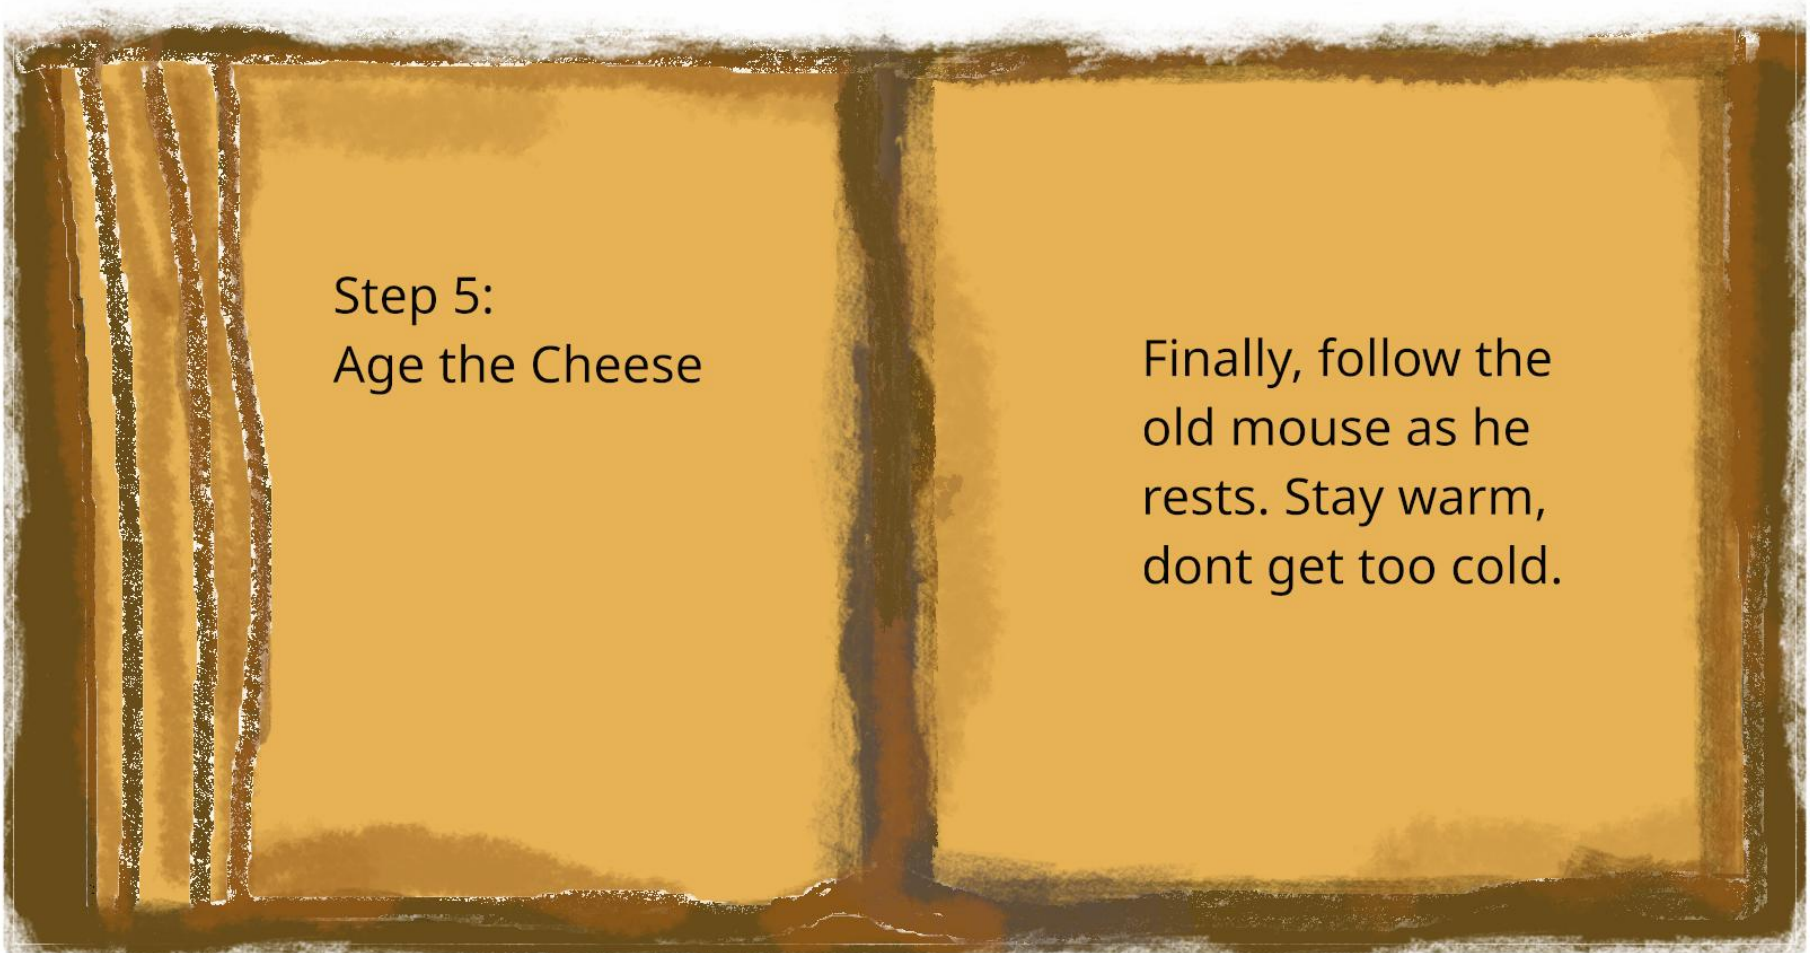

Step 3:

Curdle the Milk

First, wake what sleeps within,
Then, let golden drops begin.
Next, bring crystals from the sea,
Lastly, add the sunsets hue to thee.

Step 4: Press the cheese

Step 5:
Age the Cheese

Finally, follow the
old mouse as he
rests. Stay warm,
dont get too cold.
